

Editorial

Dear Containex partners!

In this edition of the Containex news you can inform yourself about the advantages of Containex space solutions which are already in use all over Europe. We have put together a few examples from different sectors and countries in order to show you the versatility of Containex products. Be inspired by these individually designed projects for our clients!

We also would like to keep you informed about our technical innovations - see page 4. In that section you will also find the answer to our quiz. Take your chance and win an original Viennese Sacher cake!

The Containex-NEWS team hopes you enjoy browsing this newsletter.

IZIBIZI, a big CTX space solution for small people!

The 'IZIBIZI' nursery in Wiener Neudorf near Vienna is one of many projects from the education sector which were realised in 2004.

In many of these cases, our favourable lease finance facility was accessed. Very fast construction times, low costs and high flexibility make modular solutions for nurseries and schools more and more attractive!

The children obviously feel very comfortable and the people in charge are very satisfied too! And if at some stage the number of children to be looked after should increase, 'we will simply add a few more cabins'!

Quiz-question

How do you switch on the light in the new storage container with electrics?

If you have gone through the Containex-NEWS the solution will be very easy. Send your answer with subject: Quiz-question to ctx@containex.com. The first 25 correct answers will receive an original Viennese Sacher cake.

Stand with WC cabin

Buffet

With Containex to the top of the table!

The Austrian Football League club FC Superfund trusts in space solutions from Containex for their ticket office, buffet and sanitary areas. The short assembly time and the excellent extension possibilities in particular have convinced the management.

Ticket office at the stadium entrance

Pharmaceuticals are safely stored in a CTX pharmacy ...

... as well as nicely presented to the clients.

Snack bar with comfortable garden ...

... and friendly service.

Enjoy your meal!

Our cabins are an ideal solution for the 'snack in between' too. The clients of the snack bar in Haslach an der Muehl in Upper Austria enjoy the relaxed atmosphere and of course the friendly service.

Modular building at BMW in Steyr, Austria

Changing room

BMW counts on Containex!

More than 25 CTX cabins are used at the engine factory in Steyr/Upper Austria. This enabled the creation of mess, sanitary and changing rooms within a very short time period.

CTX cabins now also in Romania - modular building in Pitesti

CTX cabins in the best locations - construction office at the State Opera House in Vienna

Temporary branch in Vienna - 'business as usual' in spite of construction works

CTX school in the green - Caldicot/Wales

Modular building at ...

... 1,800 m above sea level.

With Containex 'always in the picture'!

In the Tauferer Valley near Bruneck, Italy the TV programme 'The Alp' was produced. A modular building hired from Containex was used as broadcasting centre.

'If there is not enough space, we simply need a modular building.'

Temporary office complex at the Containex headquarters in Wiener Neudorf near Vienna

Containex clients all over Europe hear this sentence every day. Some months ago, major reconstruction works which will last for one year were started at Containex too. During the construction period a few departments are being accommodated in a modular building consisting of 9 x 20' office cabins.

Furthermore a meeting room was added to the existing showroom building. The infrastructure for IT and phones was integrated into both buildings very quickly. During the modifications to the main building the temporary offices fulfill the requirements perfectly. This has shown again, how favourable and flexible such a solution is.

Already proved and tested - the new storage container with electrics

Storage container with electrics being used

recessed external sockets

light fittings

distribution board

Have you always wanted to use your storage container as mobile workshop? Or have you ever had the problem that you would have needed light in your storage container? Now there are solutions for both: Containex offers 8', 10', 15' and 20' storage containers optionally with electrics.

The recessed external sockets enable the connection of the container to the mains. An additional container or other equipment can be connected to a second external socket. The storage container is lit up by light fittings operated by a pull cord switch next to the entrance. You can connect 2x230V as well as 1x400V equipment to the sockets of the distribution board.

Many of our clients are very enthusiastic about this innovation. The storage container with electrics is already used in many places. Also benefit from the comforts of this special equipment!

TIPS

What has to be considered when assembling a modular building before putting it into operation?

- The assembly site has to be level and solid. Wooden boards can be used as foundations if the usage time period is fairly short.

- Make sure you have all necessary permissions to set up a building.

- Make sure that there is enough space for access by truck as well as for a crane if necessary.
